All standard colours are printed on the textile with a texture weave pattern.

The Canva surface colours are close textile colour matches to the Rockfon Color-all® products. Colours may vary slightly between different production batches. Reproduction of colours may vary between print and reality. Please note that black frames combined with light coloured canvas can create a shadow effect close to the Canva. Surface textile in 'Mercury' colour does not have a metallic appearance.

The Rockfon Canva textile has a "visual direction". This means that the colours might differ depending on whether the element is suspended in portrait or landscape orientation.

## Custom graphic options

Contact your local Rockfon partner to get your choice of image, artwork, graphic design or other visual layout on the canvas surface in high resolution quality print.
